

Annual 47 C.F.R. § 64.2009(e) CPNI Certification

EB Docket 06-36

Annual 64.2009(e) CPNI Certification for 2008

Date filed: February 29, 2008

Names and Form 499 Filer IDs of companies covered by this certification¹:

MetroPCS California, LLC	821528
MetroPCS Florida, LLC	825836
MetroPCS Georgia, LLC	821526
MetroPCS Michigan, Inc.	825647
MetroPCS Texas, LLC	825648

Name of signatory: Roger D. Linquist

Title of signatory: President & CEO

I, Roger D. Linquist, certify that I am an officer of the companies named above (collectively, "MetroPCS"), and acting as an agent of MetroPCS, that I have personal knowledge that MetroPCS has established operating procedures that are adequate to ensure compliance with the Commission's CPNI rules. *See* 47 C.F.R. § 64.2001 *et seq.*

Attached to this certification is an accompanying statement explaining how the procedures of MetroPCS ensure that MetroPCS is in compliance with the requirements set forth in section 64.2001 *et seq.* of the Commission's rules.

MetroPCS has not taken any actions (proceedings instituted or petitions filed by a company at either state commissions, the court system, or at the Commission against data brokers) against data brokers in the past year.

MetroPCS has not received any customer complaints in the past year concerning the unauthorized release of CPNI.

Signed

¹ This certification also covers, to the extent required, the following MetroPCS affiliates not listed above: GWI PCS1, Inc., which holds licenses issued by the Commission but does not have its own Form 499 Filer ID because it is included in Form 499 filings made by MetroPCS Michigan, Inc.; MetroPCS Wireless, Inc., which holds an international Section 214 authorization issued by the Commission but does not have its own Form 499 Filer ID because it provides service through the subsidiaries listed herein; MetroPCS AWS, LLC, which holds Advanced Wireless Services licenses issued by the Commission but is not yet operational and therefore has no customers and no Form 499 Filer ID; and MetroPCS 700 MHz, LLC, an entity that is participating in the Commission's ongoing 700 MHz auction but does not yet hold any licenses or have any customers. When MetroPCS AWS, LLC and MetroPCS 700 MHz, LLC commence operations, their customers' CPNI will be handled in accordance with the same procedures described in the accompanying statement.

Statement

MetroPCS is a provider of Commercial Mobile Radio Service (“CMRS”) and does not offer telecommunications services to its customers in categories other than CMRS. MetroPCS does not currently use customer proprietary network information (“CPNI”) for the purpose of marketing services other than CMRS, customer premises equipment, and information services to its customers. Nor does MetroPCS share CPNI with affiliates or with third parties, other than pursuant to requests by duly-authorized law enforcement officials. Consequently, MetroPCS is not required to maintain either an “opt-in” or “opt-out” system with respect to CPNI, although it voluntarily offers its customers the ability to opt out of marketing messages. In the event that MetroPCS were to change the ways in which it uses CPNI, any such change would be reviewed and approved by the company’s CEO, who is familiar with the FCC’s rules governing the use of CPNI and who is the certifying officer for CPNI purposes.

MetroPCS has established procedures to maintain the security of CPNI of its customers. For example, MetroPCS maintains all CPNI on a secure VeriSign server, and CPNI is accessible only through a custom reporting tool available to specially-trained employees at corporate headquarters and in the field. MetroPCS requires that each customer establish a unique, secure password upon service activation, and releases non-call detail CPNI by telephone only to a subscriber upon the subscriber’s provision of the correct password. In the event that a subscriber cannot supply a valid password, non-call detail CPNI will be released only upon the presentation of unique identifying information establishing that the requesting party is, in fact, the subscriber whose records are requested. MetroPCS releases call detail records to customers only upon an in-person request and presentation of valid identification. If a customer’s identification does not match the records of MetroPCS (for example, in the case of a customer whose handset is provided by his or her employer), then a person in the store will place a call to the handset in order to verify the customer’s identity.
